CAREER PROFILE

Full-stack Product Manager with expertise in product strategy, discovery, and execution. Skilled in UX direction, PRD writing, market research, monetization strategy, and AI feature integration. Adept at collaborating with cross-functional teams to deliver user-centric products. Strong foundation in go-to-market execution and product-market fit for SaaS, AI, and cloud platforms.

KEY HIGHLIGHTS

- Led and coordinated a multi-team structure of over 100 members across product, design, AI/ML, branding, data analytics, and engineering to deliver FarmFoodHub MVP in 4 weeks, including AI chatbot integration.
- Designed and executed UX revamp strategy for CloudSania's dashboard and website, improving usability and positioning for enterprise clients.
- Authored PRDs and documentation for integrations (Slack, pipeline tools), multi-organization support, and monetization flows.
- Improved projected user activation by 18% for SugarCV through iterative onboarding flows and AI-driven prototypes.
 - Delivered AI agent development and operational dashboard strategies for SugarCV, enhancing user and admin experience.
 - Directed GTM planning and branding strategies for multiple MVPs, validating market adoption and monetization potential.

CORE COMPETENCIES

Product Roadmaps | PRD & BRD Writing | UX Design Direction | Agile & Scrum | Go-to-Market Strategy | Market Research | Monetization & Pricing | AI Integration | Cross-functional Leadership | Wireframing & Prototyping | Stakeholder Management | Product Research & Analysis

Tools: Jira, Confluence, Trello, Figma, Miro, Slack, GitHub, Google workspace & Microsoft Office Suite

Technical Skills: Basic HTML, CSS, JavaScript, Data Analytics (Excel, SQL basics)
| Familiar with CI/CD & cloud workflows

PROFESSIONAL EXPERIENCE

Product Manager | DoviLearn Global –Hull, United Kingdom - August 2025-present (Contract)

AI-powered Job Matching platform for professionals.

- Directed product discovery and market research to validate roadmap and prioritize features.
- Designed onboarding flows, tested two versions, and improved activation by 18%.
- Built interactive prototypes for iterative feedback and faster development cycles.
- Collaborated on AI agent development and operational dashboard strategies, improving job-matching accuracy and admin visibility.

Impact:

- Boosted projected activation user by 18% through improved onboarding UX.
- Delivered a validated roadmap and scalable dashboard framework for a high-impact AI-driven platform.

Product Manager (Project-Based) | Cloudsanía | June 2025-September 2025

Cloud infrastructure platform for preconfigured KONSTACK deployments.

- Developed product positioning and structural framework, aligning business goals with product roadmap.
- Led UX direction for website/dashboard revamp and new feature rollouts.
- Authored PRDs and integration strategies (Slack, pipeline tools).
- Designed pricing plans and wallet credit integration to enhance monetization.
- Created documentation for multi-organization support, enabling enterprise scalability.

Impact:

Improved onboarding and monetization readiness; increased enterprise adoption potential.

RecreaX | Product Owner (Project-based, Remote) – United Kingdom | December 2024 – May 2025

- Directed agile product delivery for web and mobile solutions, collaborating with Business Analysts to define and prioritize requirements.
- Led sprint planning, backlog grooming, and retrospectives to enhance delivery timelines and team collaboration.
- Maintained transparent communication with stakeholders through demos and progress tracking.

Impact:

- Increased sprint velocity by 12% through backlog optimization.
- Boosted stakeholder satisfaction by 18% via proactive

engagement.

Lead PM – FarmFoodHub MVP | Hackathon Project | January 2025- May 2025

- Coordinated a large-scale multi-team structure (100+ members) including product managers, Scrum Masters, AI/ML engineers, mobile developers, front-end and back-end teams, branding, data analysts, and product designers.
- Directed end-to-end product delivery, creating PRDs, monetization strategies, and GTM plans.
- Delivered AI chatbot integration and implemented currency toggle feature in 3 days when developers faced blockers. • Resolved critical Django backend issue, ensuring database stability before investor demo.
- Provided UX direction, reviewing designs, testing prototypes, and optimizing flows for both mobile and web.

Impact:

Successfully delivered a fully functional MVP within 4 weeks, ready for investor demo despite complexity and tight deadlines.

Product Management Intern | TechWits Clan | June 2024 – March 2025

- Conducted user research with 20+ participants, achieving a 90% improvement in user satisfaction scores.
- Designed and documented functional requirements for escrow services and installment payment features.
- Collaborated with design and engineering teams to reduce revision cycles by 30%.

PROJECTS

Confidential Event Management Product (NDA)

- Leading end-to-end product development for an event-tech platform, managing a team of product managers, product designers, and developers.
- Defined MVP scope, created feature roadmap, and authored PRDs and BRDs for core modules (event scheduling, ticketing, and attendee engagement).
- Conducted competitive analysis and market research to inform product positioning and monetization strategy.
- Coordinated design sprints to ensure UX consistency and scalability across mobile and web platforms.

Excelerate Global Summit

- Worked with a 3-member team to design a comprehensive event strategy, marketing roadmap, and risk management framework for an international tech summit.
- Supported planning and execution by aligning strategy with business goals and partner expectations.

SafeStash (Fintech Mock Project)

- Collaborated with a team of product managers, designers, and developers to create a fintech mock product for secure escrow-based savings and installment payments.
- Authored PRDs and feature prioritization, and designed onboarding flows and wireframes to enhance usability and user adoption.

Electronic Arts PM Simulation

- Developed a feature roadmap and KPI strategy for a gaming product, focusing on engagement, retention, and monetization optimization.
